

RESIDENTS ENCOURAGED TO GET NO COST ENERGY CONSULTATION AND IMPROVE HOME ENERGY PERFORMANCE

Residents of Glen Ridge are eligible for an innovative new pilot program that will help residents save money, improve their quality of life and protect the environment, all at the same time.

The pilot program, a benefit of participating in the Sustainable Essex Alliance (SEA), is an opportunity for homeowners and households to sign up for a no cost, no obligation Virtual Energy Consultation through a dedicated website:

<https://seaenergysolutions.wee.green>. The specialist will review the energy practices of interested residents and offer simple, cost-effective solutions that are tailored to their personal needs all virtually.

“Each of the participating towns is excited to offer the SEA Energy Challenge program to its residents,” said Mayor Stuart Patrick, Borough of Glen Ridge. “Whether people want to make their homes more comfortable or simply save money and the environment, the SEA Energy Solutions offers so many benefits to them as well as to their community.”

Among the choices available to PSE&G customers are home energy audits; lighting and appliance rebates, upgrades to high efficiency heating and cooling, and even solar energy systems with incentives and attractive financing options. Through the Virtual Energy Consultation, participants will be guided by their energy specialist as to which programs and incentives will best suit their needs. The number of participants is limited by town.

Furthermore, the program will assist qualifying low- and moderate-income households to take advantage of a wide range of efficiency measures at little or no cost to such customers.

The SEA Energy Solutions program is intended as a pilot program that ultimately will help to create a full-scale residential energy efficiency outreach and energy- planning program for participating communities, including other towns in Essex County.

About Sustainable Essex Alliance: The Sustainable Essex Alliance (SEA) is a coalition of local municipal green teams, environmental commissions and sustainability organizations working together to create solutions for local environments and economies.
